

PROFILE

I specialise in large murals & street art. I have 7 years professional experience & have completed over 250 public pieces. Many of these are well known nationally.

My work is varied but always high quality. Prints and canvases are well sought after, and my work sells all over the world. I am highly adaptable and work with a wide variety of clients, from small businesses and schools to local authorities, art galleries, global companies and Premier League football teams.

Record holder for the largest painting ever created in the UK by one person. My work was the sole focus of Liverpool's first (and only) street art exhibition.
